

## Delmar Streetscape Improvements

University City, Missouri

The Delmar Streetscape project area connects the University City Loop area to the west and DeBaliviere Avenue to the east. This area of Delmar, approximately a half mile long, primarily consist of commercial properties with residential neighborhoods to the north and south.

One of the key elements of this area is the Delmar MetroLink Station which is situated at the mid point of this stretch of Delmar. Austin Tao & Associates (ATA) is responsible for the design of the streetscape improvements, which include new sidewalks, curbs, street trees, street furniture, improved crosswalks and lighting. The project is being co-sponsored by the City of St. Louis, University City, the Bi-State Development Agency and the DeBaliviere Neighborhood Association.
